

Brevard County Board of County Commissioners

2725 Judge Fran Jamieson
Way
Viera, FL 32940

Legislation Text

File #: 5061, **Version:** 1

Subject:

Approval of AT&T Addendum to the Incumbent Local Exchange Carrier (ILEC) Intrastate Pricing Schedule.

Fiscal Impact:

None

Dept/Office:

Public Safety Group: Emergency Management

Requested Action:

It is requested that the Board of County Commissioners approve the addendum to AT&T ILEC Intrastate Pricing Schedule FL09-4148-07 for the County's Emergency 9-1-1 System and authorize the County Manager to sign the Pricing Schedule, subject to approval by the County Attorney's Office, Purchasing and Risk Management.

Futhermore, it is requested that the Board authorize the County Manager or his designee, to execute any additional changes, amendments, documents, administrative or budget change requests, subject to approval by the County Attorney's Office, Risk Management, and Purchasing.

Summary Explanation and Background:

There is no change in the Price Schedule per end-user position in this addendum. The Price Schedule will be effective from 2022 to 2027, with an auto-renewal option to extend for additional one-year terms under the same terms and conditions.

The Board approved the current five-year Pricing Schedule in 2016 with a monthly cost of \$1,083.00 per end-user position per month for a total five-year cost of \$4,158,720.00.

In 2010 the Board approved an AT&T ILEC pricing schedule for the purchase, installation, and maintenance of hardware, software, and peripherals to facilitate Emergency 9-1-1 System call taking in the eleven Public Safety Answering Points (PSAPs).

In 2016 the Board approved transitioning to a hosted call handling solution provided by AT&T. This change offered the same services that the County purchased in 2010, but without the capital expense of owning the equipment. Additionally, the hosted solution afforded two dedicated AT&T technicians, certified to perform maintenance and repairs on the hardware, software, and peripherals.

Through software, hardware, and peripheral upgrades, the call handling system has remained robust and unfailing for seven years, with twenty-four-seven utilization by two hundred and thirty end-users processing over three hundred thousand calls per year. Furthermore, the technicians responding to any anomaly are not

only trained and certified to perform repairs and maintenance, but they are also proficient in the dynamics and customizations of the Brevard system.

Clerk to the Board Instructions:

Please have the County Manager sign and return the original to John Scott, Director, Emergency Management, 1746 Cedar Street, Rockledge, FL.
