The Board of County Commissioners,

4/24/2024

I received a letter from you concerning Air Diguide. It was addressed to my husband, Raymond Shewinski. He passed away over a year ago. It would attend the meeting but I will be recuperating from surgery at that time.

I live across the street from Air Diguide. I have lived here over 20 years. In the past there was noise but not nearly as loud as it is now. The sound coming from them is as loud a person can't hear another person talking. One might it was so loud a picture fell off the wall and a curtain not fell off the bathroom window. I can feel vibrations on the floor in my house.

This is a residential area. There are many houses around here on streets like 15th and Pine Island. Air Diguide needs to move onto the Kennedy Space Center property. Away from homes.

My husband had heart problems and I'm sure the noise from Air Liquide did not help. It is frustrating and aggravating.

Please do something about this problem and make it pleasant around here again.

Sincerely,
Mary Slowinski
