EXHIBIT A

Project Description and Responsibilities

A. Project Description (description of Agency's project to provide context, description of project components funded via this Agreement (if not the entire project)): AWOS Installation - Design, Bidding, Acquisition, Installation and Training of Automated Weather Observation System (AWOS). Replace existing AWOS that is no longer cost effective to maintain.

B. Project Location (limits, city, county, map): Valkaria Airport/Valkaria, FL/Brevard

C. Project Scope (allowable costs: describe project components, improvement type/service type, approximate timeline, project schedule, project size): The airports design engineer will assist with the development of performance specification, bid package, design, and installation of an Automated Weather Observation System (AWOS) III P/T or an alternate system that provides similar performance characteristics. They will provide coordination with the Federal Communications Commission (FCC), the Federal Aviation Administration (FAA) and the OEAAA for the acquisition of additional frequency and needed airspace analysis for the frequency and installation site of the system. Award of the construction phase contract will be based on bids and awarded to the lowest, technical compliant, and responsible bidder for the procurement, installation and training for the AWOS III P/T or equivalent alternate system.

Weather Reporting Equipment: As required by 215.971, F.S., this scope of work includes but is not limited to consultant and design fees, survey and geotechnical costs, permitting, construction inspection and material testing costs, mobilization and demobilization, purchase, delivery, installation, testing, commissioning of the equipment, coordination with all necessary agencies; and site preparation (earthwork and electrical work). It includes all materials, equipment, labor, and incidentals to complete a Weather Reporting Equipment installation project.

The project is amended to add funding for construction based on the Agency's winning bid amount for the Replacement of AWOS III P/T described in the Design-Build Criteria Package Bidding Documents provided by Avcon, Inc. dated October 2021 at Valkaria Airport.

D. Deliverable(s): Final closeout documents to be uploaded into Jacip.

The project scope identifies the ultimate project deliverables. Deliverables for requisition, payment and invoice purposes will be the incremental progress made toward completion of project scope elements. Supporting documentation will be quantifiable, measurable, and verifiable, to allow for a determination of the amount of incremental progress that has been made, and provide evidence that the payment requested is commensurate with the accomplished incremental progress and costs incurred by the Agency.

E. Unallowable Costs (including but not limited to): Stored Material

F. Transit Operating Grant Requirements (Transit Only):

Transit Operating Grants billed as an operational subsidy will require an expenditure detail report from the Agency that matches the invoice period. The expenditure detail, along with the progress report, will be the required deliverables for Transit Operating Grants. Operating grants may be issued for a term not to exceed three years from execution. The original grant agreement will include funding for year one. Funding for years two and three will be added by amendment as long as the grantee has submitted all invoices on schedule and the project deliverables for the year have been met.
