

# Brevard County Board of County Commissioners

2725 Judge Fran Jamieson  
Way  
Viera, FL 32940

## Legislation Text

---

File #: 2405, Version: 1

---

### **Subject:**

Expansion of Vaccination Operations in Brevard County

### **Fiscal Impact:**

Not to exceed two million dollars sourced from the Public Safety fund for up to 6 months execution of the program

### **Dept/Office:**

Public Safety / Emergency Management

### **Requested Action:**

Request the Board consider and approve \$2 million from the Public Safety Fund for County staff to expand the current vaccination program; provide capability to distribute an additional 1000 vaccination shots per day in addition to the current Florida Department of Health capacity of up to 700 vaccination shots per day; and for the program to last up to 6 months from the start date. It is also requested the Board waive procurement policy in obtaining this contracted service in an effort to have contract execution begin as quickly as possible. County Purchasing is currently reaching out to known vendors who have the capability to provide this service to Brevard County. Staff will bring back for Board approval contract(s) that have been identified to meet County requirements and timelines. The requested Board action would authorize Public Safety Funds be used for anticipated staffing as well as logistical and site requirements.

### **Summary Explanation and Background:**

Currently the Florida Department of Health, in Brevard County, is providing vaccinations to those over 65 years of age. This action allocates funds and directs staff to expand the vaccination program in Brevard to meet the state's goal of "shots in arms" as quickly as possible. This program will target the same age risk population until state guidance changes to expand vaccination eligible populations. Florida Division of Emergency Management (FDEM) is encouraging counties build systems to increase vaccination distribution capacity.

Future vaccine allocations will be based on a county's capacity and speed in distributing vaccines. This action increases Brevard's vaccine distribution capabilities where we remain competitive for receiving future vaccines as distributed by the state in the most expeditious and advantageous manner possible based on the State of Florida's current vaccine distribution strategy.
